

ENGLISH GOLD ADVENTURE

Teacher Quick Guide - simple, practical and creative

Maestra Bia

What is it for? A playful app for consolidating listening, vocabulary, pronunciation, spelling and simple English sentences. It includes 150+ words, short sentences, English audio, quick games, an adventure map and a team mode for the interactive whiteboard.

1. Quick start

- Open the HTML file with Chrome, Edge or Firefox. No installation is required.
- Check that “Audio ON” is displayed at the top.
- Click once anywhere on the page before the first listening activity: some browsers block automatic audio until the user interacts with the page.
- Choose a name and avatar for individual play; on the interactive whiteboard, you can use a team name.
- Recommended routine: LISTEN ×2 -> REPEAT -> PLAY/ANSWER -> REPEAT AGAIN.

Golden routine. Listen twice, ask pupils to repeat, then play. Audio is not an extra feature: it is at the heart of the activity.

2. Main game modes

Mode	What it does	Best use
Magic Map	Main pathway with themed worlds, treasure chests and mini-bosses.	Structured review by topic or week.
Listen & Catch	Listen and choose the correct picture/word.	Quick warm-up or listening consolidation.
Magic Dictionary	Vocabulary bank with audio played twice.	Recovery, reinforcement and guided study.
Listen & Repeat	Short sentences to listen to and repeat.	Pronunciation, rhythm and speaking confidence.
What’s Missing?	Vocabulary memory game.	Small groups or short lesson breaks.
Sentence Builder	Rebuild simple sentences in the correct order.	Word order and sentence structure.
Team Battle LIM	Two teams cooperate against the Word Monster.	Whole-class interactive whiteboard activity.

3. Using it on the interactive whiteboard

- Rotate who comes to the board so that the same pupils are not always clicking.
- Before clicking an answer, ask the pupil or team to say the word or sentence aloud.
- Give teams a few seconds to discuss before answering.
- After the correct answer appears, have the whole class repeat it.
- Use points as motivation, not as a judgement or formal grade.

4. A ready-to-use 30-minute lesson

Time	Stage	Activity
5 minutes	Warm-up	Magic Dictionary or Listen & Repeat with 8-10 words/sentences.
8 minutes	Listening	Listen & Catch or one world from the Magic Map.
10 minutes	Guided game	Play through the chosen world, including the treasure chest and mini-boss.
5 minutes	Speaking	Say It! or choral repetition of words and short sentences.
2 minutes	Closing	One final question, a badge, or a symbolic certificate.

5. Inclusion and differentiation

- For pupils who need more support: use single categories, the dictionary and highly visual games.
- For more confident pupils: use Sentence Builder, the Secret Room and the Golden Crown Finale.
- For multilingual learners: prioritise images, listening and repetition; translation should remain a support, not the starting point.
- Allow pupils to listen again without rushing: the goal is to understand and speak, not to answer as fast as possible.

6. Teacher Mode

- Teacher code: BIA4.
- Use Teacher Mode to choose the difficulty level, number of questions, topics, interactive-whiteboard mode and targeted review.
- It is useful for preparing focused revision before an informal check or for adapting the activity to a specific group.

A small teaching trick. Do not explain every reward in advance. Badges, treasure chests and surprises are more motivating when pupils discover them while playing.

7. If something does not work

- If there is no sound: check “Audio ON”, turn up the computer/whiteboard volume and click once on the page before pressing Listen ×2.
- To leave any activity, use the HOME button at the top.
- The app works offline: once the HTML file is saved on the computer, an Internet connection is not required.

In short. Use the app little and often. Even 15-20 minutes a week can become an effective and enjoyable revision routine.

Ideas grow when they are shared.
